

Position Title: Entry Level Java Developer

Location: Fort Knox, KY

Security Clearance Requirement: Secret

Schedule: Full-time, M-F

Shift: 8a-5p

Travel: Local area only. Possible infrequent travel between Fort Knox and Fort Carson.

ESM is seeking an Entry Level Java Developer to be responsible for building and supporting large scale Java applications. Your primary responsibility will be to design and develop these applications, and to coordinate with the rest of the team working on different layers of the infrastructure. Thus, a commitment to collaborative problem solving, sophisticated design, and product quality is essential.

- Design highly scalable software solutions to improve functionality and system longevity
- Collaborate with project managers to implement end-to-end solutions for complex projects
- Lead small teams of junior and intermediate level developers
- Analyze current systems to maintain integrity and improve architecture
- Remain informed of current trends and technology developments

PRIMARY DUTIES AND RESPONSIBILITIES:

- Translate application storyboards and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable Java code
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify bottlenecks and bugs, and devise solutions to these problems

REQUIRED EDUCATION AND EXPERIENCE:

- Active Security Clearance at the Secret level
- Senior Java developer with 1+ years of experience
- Bachelor of Science in Computer Science or Engineering
- Strong working knowledge of the Spring Framework
- Strong development experience & capability using JEE, JMS, JSP / Servlets; JavaScript (jQuery, Angular JS), HTML 5, CSS

REQUIRED CERTIFICATIONS:

- CompTIA Security+
- Java 8 OCA or Java 8 OCP

HIGHLY DESIRED SKILLS:

- Working knowledge of Oracle Database
- Expertise in agile and scrum development cycles
- Solid understanding of object-oriented programming
- Familiar with various design and architectural patterns

DISCLAIMER: This information has been designed to indicate the general nature and level of work performed by employees within this classification. It is not designed to contain or be interpreted as a comprehensive inventory of all duties, responsibilities, and qualifications required of employees assigned to this position.

- Knowledge of web services and related technologies
- Familiarity with concepts of MVC, JDBC, and RESTful
- Understanding fundamental design principles behind a scalable application
- Creating database schemas that represent and support business processes
- Implementing automated testing platforms and unit tests
- Experience with QA duties (usability testing, performance testing, automated testing, test scripts, test cases and test plans)
- Proficient understanding of code versioning tools, such as Subversion and Git
- Familiarity with build tools such as Ant and Maven
- Familiarity with continuous integration
- Familiarity with the Atlassian Suite of tools

COMPETITIVE COMPENSATION PACKAGE:

We offer a competitive benefits package that includes: Paid Holidays, Paid Time Off, medical, dental and vision insurance, life insurance, long-term disability insurance, and a 401(k) plan.
